

Michele Carollo

Tax Advisor, Controller & Financial Analyst

With more than eight years of experience in the financial markets, I have mastered all financial applications and instruments. I have a deep knowledge of tax and accounting issues, working in the sector for some years, in close contact with law firms, accountants, public bodies and trade associations. I also deal with digital signature and with various IT aspects, including privacy and electronic invoicing. Then, I develop the business analysis for "PMI" and I am an associate AssoController (certified).
